Become a Lifeguard TODAY!

It's getting to be that time of year when young people and teenagers are looking for summer employment. Like most of us, you want a job that pays well, offers a flexible schedule, and a positive upbeat work environment. Perhaps, you should consider becoming a certified lifeguard and employee of the Fairmont Aquatic Park. You'll never need to look for another summer job throughout your high school and college years!

Being a lifeguard offers many advantages and benefits:

Becoming a lifeguard requires certification in various lifesaving skills. Lifeguarding is a HUGE responsibility. Lifeguards are trained responders in lifeguarding, cardiopulmonary resuscitation (CPR), automated external defibrillation (AED) and first aid. The lifesaving skills acquired in lifeguard training can be used throughout your life.

As a lifeguard, you will learn and develop skills in leadership and communication. These skills are valuable assets to a student applying for college entrance as well as in his/her future career.

One quite obvious benefit of lifeguarding is that lifeguards spend most of their working time outside. If you enjoy the warm temperatures and the water, there is no better place to spend your days than working at the Aquatic Park. By the end of summer, you'll be sporting a nice bronzed glow. And while working on this great tan, you will also be working to protect the lives of all our patrons. Everyone needs to know their job is valuable - a lifeguard can be assured their job truly matters. A lifeguard plays a very important role in keeping people safe in and around the water.

Being a lifeguard is a rewarding job.

Lifeguards have fun while earning money at a job they love.

Get prepared for your position as a seasonal lifeguard at the Fairmont Aquatic Park.
